

BRINGING HOPE

NBOI

ONE CHILD AT A TIME

BEFORE

PRESENT SITUATION

FUTURE ANTICIPATION

NBOI has been working with communities in Kenya to improve the standard of living for children and adults. Our goal has been to insure that families will have access to clean, safe, sustainable drinking water to prevent sickness and death from water borne diseases.

90 kilometers southwest of Nairobi is the Katangi community of 5,000 people whose women and children walk up to two hours a day using donkeys and jeri cans to get water from a dam or river that is unsafe.

NBOI has been blessed to be involved with a project to bring a borehole and a kiosk that will provide the clean water to change the situation.

The first phase of this project, the borehole, is complete and God has provided the water. Our prayer is to complete the last phase which involves the installation of a submersible pump, storage tank, tower solar panels and a distribution kiosk.

We need your help through prayer and generous giving to complete this miraculous life changing work .

God is allowing us to work and partner with the ingenious community for His glory.

What is needed for completion of this project:

Kiosk construction,

Solar power panels,

Elevated storage tank

Submersible pump installation.

Security fence and CCTV cameras

TOTAL FUNDS NEEDED: \$13,360.
